

SAPTA BORNEO GROUP

Global Investment & Infrastructure Development Platform

Building Global Infrastructure

Connecting Investment, Industry & Energy

Sapta Borneo Group is an international investment and project development platform focused on infrastructure development, renewable energy, industrial agriculture, and global trade.

The group operates through a strategic international corporate structure spanning **United Kingdom, Hong Kong, United States, and Indonesia**, creating cross-border, trusted strategic industrial infrastructure, corporate, and global partnerships, and large-scale industrial project development.

Sapta Borneo Group develops industrial investment connecting **energy, agriculture, logistics and infrastructure**, creating sustained long-term economic value.

SAPTA BORNEO GROUP

Sapta Riswandy

Founder & Beneficial Owner
Sapta Borneo Group

Professional Profile

Sapta Riswandy is the founder and beneficial owner of **Sapta Borneo Group**, an international investment and project development platform focused on infrastructure development, renewable energy, industrial agriculture, and global trade.

He leads the group's strategic vision to develop integrated industrial ecosystems connecting energy production, agricultural processing, logistics infrastructure, and international investment partnerships.

Leadership Expertise

- Infrastructure Project Development
- Renewable Energy Investment
- Industrial Agriculture & Processing
- International Commodity Trade

Leadership Vision

Sapta Riswandy aims to establish **Sapta Borneo Group** as a global infrastructure investment platform, connecting international

INTEGRATED SUGAR & BIOMASS ENERGY PROJECT

SAPTA BORNEO
GROUP

Project Information

- Project Name: Integrated Sugar & Biomass Energy Project
- Location: Majalengka, West Java – Indonesia
- Developer: PT Sapta Borneo Utama
- Total Land Area: +545 Hectares

Industrial Capacity

 Sugar Mill | 10,000 TCD

 Biomass Power Plant | 30 MW

Renewable Energy Integration

- Energy self-sufficiency for the industrial complex
- Renewable electricity generation
- Reduced carbon emissions
- Potential carbon credit monetization

Infrastructure Components

- Sugar processing plant
- Biomass power generation plant
- Industrial logistics and storage facilities
- Internal road network and utilities
- Water treatment and supporting infrastructure

Strategic Impact

- Industrial agriculture development
- Renewable energy transition
- Regional economic growth
- Job creation and industrial ecosystem development

INTEGRATED INDUSTRIAL INFRASTRUCTURE PLATFORM

SAPTA BORNEO
GROUP

CORE INDUSTRIAL INFRASTRUCTURE

SUGAR PROCESSING PLANT

High-capacity sugar mill with processing capability of 10,000 tons of cane per day (TCD) for large-scale industrial sugar production.

BIOMASS POWER GENERATION PLANT

A 30 MW biomass power plant utilizing bagasse, a by-product of sugarcane processing, to generate renewable electricity.

INDUSTRIAL LOGISTICS & STORAGE

Integrated logistics infrastructure including

- Bulk storage facilities
- Warehouse systems
- Transportation infrastructure
- And industrial tribution hubs

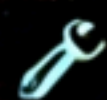

INDUSTRIAL UTILITIES

The project includes essential supporting infrastr:

- Water treatment plant.
- Internal road network
- Power distribution systems
- Industrial utilities and support facilities

INTEGRATED INDUSTRIAL ECOSYSTEM

Agriculture:

Sugarcane production and supply development.

Energy:

Renewable electricity generation from biomass

Manufacturing:

Sugar processing and donenstream products in

LONG-TERM INDUSTRIAL EXPANSION

- Soritae brugter e prioriens to idvelabe
- Athhonol production facility
- Additional biomass energy capacity
- Industrial estate development
- Agricultural supply chain expansion

INTEGRATED INDUSTRIAL INFRASTRUCTURE PLATFORM

SAPTA BORNEO
GROUP

CORE INDUSTRIAL INFRASTRUCTURE

Sugar Processing Plant

High-capacity sugar mill with processing capability of 10,000 tons of cane per day (TCD) designed for large-scale industrial sugar production.

Biomass Power Generation Plant

A 30 MW biomass power plant utilizing bagasse, a by-product of sugarcane processing, to generate renewable electricity.

Industrial Logistics & Storage

Integrated logistics infrastructure including:

- Bulk Storage facilities
- Warehouse systems
- Transportation infrastructure
- Industrial distribution hubs

Industrial Utilities

The project includes essential supporting infrastructure:

- Water treatment plant
- Internal road network
- Power distribution systems
- Industrial utilities and support facilities

INTEGRATED INDUSTRIAL ECOSYSTEM

Agriculture

Sugarcane production and supply chain development.

Energy

Renewable electricity generation from biomass.

Manufacturing

Sugar processing and potential downstream products.

- ✓ Ethanol production facility
- ✓ Additional biomass energy capacity
- ✓ Industrial estate development
- ✓ Agricultural supply chain expansion

STRATEGIC OBJECTIVE

Sapta Borneo Group aims to develop a sustainable industrial ecosystem integrating agriculture, renewable energy, manufacturing and logistics infrastructure.

STRATEGIC INVESTMENT OPPORTUNITY

SAPTA BORNEO GROUP

Project Investment Highlights

USD 1 BILLION

Total Project Investment

10,000 TCD Sugar Mill

30 MW Biomass Power Plant

±545 HECTARES

INVESTMENT STRUCTURE

Equity Investment | **10 – 20 %**

Project Finance | **80 – 90 %**

Estimated Financing Tenor | **15 – 20 Years**

Revenue Ecosystem

- Sugar production and sales
- Biomass electricity generation
- Industrial by-products
- Potential carbon credit monetization

Long-Term Industrial Expansion

- ✓ Ethanol production facility
- ✓ Additional biomass energy capacity
- ✓ Industrial estate development
- ✓ Agricultural supply chain expansion

INSTITUTIONAL PROJECT SCALE

The project is designed as an institutional-scale infrastructure investment platform, targeting participation from international investors, infrastructure funds, and financial institutions.

ENVIRONMENTAL, SOCIAL & GOVERNANCE (ESG)

SAPTA BORNEO GROUP

Environmental Responsibility

The Integrated Sugar & Biomass Energy Project utilizes bagasse, a by-product of sugarcane processing, as a renewable biomass fuel.

The project supports global efforts toward industrial decarbonization and renewable energy adoption.

Sustainable Agriculture

The project promotes responsible agricultural practices through the development of a structured sugarcane supply chain.

- Sustainable sugarcane cultivation
- Farmer partnership and outgrower programs
- Long-term rural economic development

Social Impact

Sapta Borneo Group projects aim to contribute to regional development."

- Job creation and workforce and diene parent.
- Industrial ecosystem growth
- Local supplier and contractor participation
- Community economic empowerment

Governance & Compliance

Sapta Borneo Group is committed to maintainin high standards of corporate governance, transparency, and regulatory compliance.

LONG-TERM SUSTAINABILITY VISION
